Can We Help?

6:30pm Friday, 27 Jun 2008 [Education](#) CC G
[Website](#)

Imagine being without a family, and then finding out you have a huge one. Lyn Wragg has spent all of her adult life searching for her biological family, having no idea where her search would lead her. After nearly 20 years of letter writing and phone calls, Lyn finally found the information she was looking for. To her great shock she discovered that she did have brothers and sisters, eleven of them. Knowing she had siblings was one thing, finding and meeting them was another. That's where the **Can We Help?** team steps in, bringing Lyn and some of her siblings together for the very first time.

The names Warri and Yatungka might not roll off the tongue as easily as Romeo and Juliet, but they certainly have their Shakespearean counterparts trumped in the romance stakes. Warri and Yatungka's story is not only true, but set amongst the rugged beauty of the Gibson Desert. This week's 'Moment In Time' segment tells the story of these two Indigenous Australians who defied their tribes and dared to fall in love.

Parenting doesn't come with an instruction manual, but that doesn't mean there isn't help at hand. This week's expert is child psychologist Andrew Greenfield. He'll help you handle the terrible twos as well as measure your child's IQ.

Linguist Kate BurrIDGE gets her tongue around some of the trickier words in our language, revealing why we count sheep instead of 'sheeps'.

Pete Rowsthorn will make sure you never lose your car keys again as he investigates how our memory works, and what we can do to improve it.

Our team also solves the mystery of how we grow trees from seedless fruit, and explains why touching a monarch in some cultures has led to death.

***Can We Help?** will be repeated on ABC2 - Monday 30 June at 5.35pm*

Also showing on ABC2

- 5:35pm Monday, June 30
